The ERGONOMIC Window

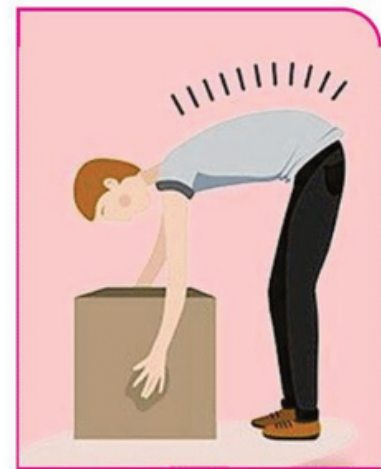

SLIM LIFTS

Ergonomics For The Modern Factory

Slim Lifts are the perfect answer to handle heavy loads at working heights and can also be used as a work positioner. It is easy to install and it can be placed directly on the floor **NO PIT REQUIRED**. If a pit is required, it can be made so shallow – only 90mm deep. SLIM LIFT is the perfect solution for efficient lifting, lowering and positioning on intermediate, suspended or mezzanine floors, they take the back ache and strain out of bending & lifting.

Caution!

People are biological constructions. Their structure of muscle and bone is not adapted to strenuous lifting. Even relatively light lifting, if done improperly or over a period of time, can cause considerable damage.
